**FOR IMMEDIATE RELEASE**

**Superlift Offers 2.5" And 6" Lift Systems  
For 2007 Chevy/GMC 4WD And 2WD Pickups & SUVs**

**West Monroe, LA** – Superlift has two suspension systems for 2007 GM pickups and SUVs (C/K1500, Tahoe/Yukon, Suburban/Yukon XL and Avalanche).

A 2.5" kit levels the vehicle and clears larger tires. Superlift uses either front preload rings under the factory shocks' coils or replacement high-pressure-gas Superlift monotube shocks with the factory coils. Factory "rake" can be retained by using 1.5" or 2" rear lift blocks (pickups) or .75" coil spacer (SUVs). Optional Superlift Superide replacement rear shocks are available.

Superlift's 6" system was modeled using advanced computer-design software. Driveability and durability are prioritized with proper coil spring rates and shock dampening, suspension travel control, steering geometry and CV-axle operating angles.

The front kit uses high-clearance, one-piece lower control-arm crossmembers combined with replacement cast ductile iron knuckles. 4x4 applications include brackets that lower the differential 5" for proper CV angle, and CNC-machined spacers allow the OE axleshafts and front driveshaft to be retained. A differential skidplate ties together the crossmembers and is further reinforced by DOM-tubing kicker braces that attach to the frame; all load-bearing bracketry is made from laser-cut 1/4"-thick steel plate. Autoride function is retained by using replacement front shock towers with preload rings mounted below the factory front coils to increase spring rate. Non-Autoride kits use extended Superlift high-pressure-gas monoutube shocks with the factory springs.

Pickup rear lift options are 5" tapered blocks or Superide replacement springs; SUVs utilize new coil springs plus all necessary bracketry for proper 4-link function. A return-to-stock kit is also available.

The three rear shock choices are standard Superlift Superide, Superide Select Series (SS) monotubes or Superide Select Series with remote reservoir (SSR). A stainless steel front skidplate is also available. All Superlift components are covered by a Limited Lifetime Warranty.

For more information, contact your nearest Superlift dealer, call 800-551-4955 to speak with Superlift's sales and tech support staff or visit [www.superlift.com](http://www.superlift.com): Superlift Suspension Systems, 300 Huey Lenard Loop, West Monroe, LA 71292, 800-551-4955 toll-free, 318-397-3040 fax, [www.superlift.com](http://www.superlift.com).

###

*Formed in 1975, Superlift Suspension Systems is a pioneer in the off-road industry. Today, Superlift is one of the largest suspension companies in the off-road market and is one of the few suspension companies owned and operated by actual four-wheel-drive enthusiasts. Superlift's company philosophy and quality product line reflect the passion of its employees and management for four-wheel-drive vehicles of all sizes and years.*
