FOR IMMEDIATE RELEASE

**Superlift Offers Six Steering Stabilizer Solutions
For 2007-2012 Jeep JK Wranglers**

West Monroe, LA – Superlift gives Jeep JK owners increased control with a choice of three different steering stabilizer mounting solutions, in both single and dual configurations. Upgraded single cylinders replace the OE stabilizer in its stock location. Superlift also offers high-clearance mounting for both single and dual stabilizers.

Two stabilizer styles are available. White-bodied Superide twin-tube hydraulic cylinders are a cost-effective upgrade over the OE stabilizers.

JK owners who want ultimate control can step up to Superide SS stabilizers. Manufactured by Bilstein, these silver-zinc monotube stabilizers offer quick response and firm damping.

Here are the six possibilities:

- OE Replacement with Single Superide Stabilizer (PN 92085)
- OE Replacement with Single Superide SS (PN 92115)
- High-Clearance Single Superide (PN 92075)
- High-Clearance Single Superide SS (PN 92135)
- High-Clearance Dual Superide (PN 92095)
- High-Clearance Dual Superide SS (PN 92105)

For more information, contact your nearest Superlift dealer, call 800-551-4955 to speak with Superlift's sales and tech support staff or visit www.superlift.com. Superlift Suspension Systems, 300 Huey Lenard Loop, West Monroe, LA 71292, 800-551-4955 toll-free, 318-397-3040 fax, www.superlift.com.

###

Formed in 1975, Superlift Suspension Systems is a pioneer in the off-road industry. Today, Superlift is one of the largest suspension companies in the off-road market and is one of the few suspension companies owned and operated by actual four-wheel-drive enthusiasts. Superlift's company philosophy and quality product line reflect the passion of its employees and management for four-wheel-drive vehicles of all sizes and years.
